the DUS testing for different candidate varieties taken up along with the claimed distinct characteristics and the expression of the same. Dr. Vilas Tonapi, Principal Scientist (SST) and Dr. Elangovan, Principal Scientist (PGR) also attended the monitoring. Dr Aditya Sharma, Plant Breeder,

Represented M/S Syngenta India Limited. Under 1st year testing four candidate varieties (CSV 26, CSV 29R, DGJ 025 and Dadar) were tested along with four reference varieties, and under 2nd year testing three candidate varieties (KSR 6310, KSR 6313 and Aparna) were tested along with five reference varieties. The overall crop growth and expression of morphological characters were very good in all the candidate and reference varieties. The Chairman appreciated the overall conduct of DUS testing trials. In some of the candidate varieties like CSV 26, DGJ 025, Aparna, KSR 6313 and KSR 6310, there was slight difference in the observed and claimed traits, and the same had been noted in the monitoring proformae. Apart from DUS testing trials maintenance breeding of 56 reference varieties was also taken up. The report of the monitoring team and DUS test proformae for the candidate varieties were prepared by the team.

Training programme on "Post Harvest Technologies of Sorghum & other Millets" for AP & Telangana farmers
