ICAR-Indian Institute of Millets Research (IIMR)

Rajendranagar, Hyderabad 500030

Response to RTI application

To undertake a research on Millet production, I request you to provide the following details

Query: District wise details of area under millet cultivation in Tamil Nadu for the past three decades

Response: ICAR-Indian Institute of Millets Research is a national institute to conduct research on agricultural aspects of millets production. The institute does not collect or possess the data on production of millets in various parts of the country. This information may be available with the agricultural department of the concerned state and districts. Some data in this regard is available in the portal of Ministry of Agricultural and Farmers Welfare, Govt. of India, which can be assessed at <https://eands.dacnet.nic.in/>

Query: The dominant variety of millet which is cultivated in each district of Tamil Nadu

Response: Information is not available with ICAR-IIMR. This information may be available with the agricultural department of the concerned state.

Query: List of wet and dry regions of Tamil Nadu

Response: Information is not available with ICAR-IIMR. This information may be available with the agricultural department of the concerned state. Also, the definitions of what constitutes wet or dry region is not clearly stated by the applicant.

Query: What are the challenges faced by Millet producers in these wet and dry regions of Tamil Nadu

Response: The definitions of what constitutes wet or dry region is not clearly stated by the applicant. However, broadly it can be said that millets have lower water requirement and are grown in rainfed situations. Nevertheless, ICAR-IIMR, Hyderabad has no specific information on the challenges faced by the millet producers in Tamil Nadu.

In general, the following are the challenges faced by the millet farmers.

Low productivity of millets

Compared to wheat, rice and maize, millets have lower productivity in the country. This is attributed to their cultivation in marginal lands in rainfed farming and non-adoption of improved cultivars. The yield gap in millets is largely a reflection of farmers' cultivation technologies that offer ample room for improvement. Seed is usually farm-saved and of poor quality because farmers lack the ability to select seed and store it well. In addition to poor seed stocks, cultivation is not optimal. Higher yields of sorghum, pearl millet, finger millet, foxtail millet and little millet have been realized when they are grown in resource-intensive conditions such as in summer.

Processing of small millets

Absence of efficient primary processing machinery of small millets for dehulling is a challenge. Associated drudgery in primary processing of small millets in particular has caused significant decrease in the consumption of millets in the country. The available

machinery is of moderate efficiency of 65-80 % only. The initiative to fabricate more efficient processing machines will surely ensure not only in reduction in consumer cost but also enhances producer share in consumer rupee. Further, such machinery needs to be available in the close vicinity to reduce transport costs, which is not the case in most regions.

Farmer-market linkages

A significant amount of money paid by the consumers is lost in the current supply chain models dominated by large number of intermediaries. In many parts of the country where farmers are producing traditional grains like Millets fail to find steady market for their produce. On the other hand, the emerging entrepreneurs doing business in these crops like millets find it difficult to get the source of quality grains on a continuous basis. Thus linking the producers of these crops with entrepreneurs will solve the problem.

MSP and procurement policy

Major millets like sorghum, pearl millet and finger millet are covered under the Minimum Support Scheme (MSP). However, there is no MSP for other millets. Even for those millets where there is MSP, procurement is lower. The main objective of the agricultural price policy of the government should be providing steady and remunerative prices to the millets farmers. The price realized for millets would be a major driver of growth of value of output of millets along with growth in area and yield. State Governments and their agencies should step up to extend the benefit of MSP to the farmers.

ICAR-Indian Institute of Millets Research (IIMR)
Rajendranagar, Hyderabad 500030

Query 1: List of Top Five Millets: Provide a comprehensive list of the top five millets grown in India, including their respective scientific names and common names in various local languages

Reply: As per the classification of millets in the category of “Coarse Cereals” by the Ministry of Agriculture & Farmers Welfare, wherein the area, production and yield data of millet crops are provided, there are four categories under which data is presented. They are “Jowar, Bajra, Ragi and Small Millets. There is no such classification such as “top millets” or “top five millets”. The Small millets category consists of combined data of foxtail millet, barnyard millet, kodo millet, little millet and proso millet. The details of scientific names and common names in regions where they are grown is as below.

Scientific name	English name	Common names
<i>Sorghum bicolor</i>	Sorghum, Great millet	Bengali: Jowar Gujarati: Jowari, Juar Hindi: Jowari, Juar Kannada: Jola Marathi: Jowari, Jondhala Oriya: Juara Punjabi: Jowar Tamil: Cholam Telugu: Jonna
<i>Pennisetum glaucum</i>	Pearl millet, Millet	Bengali: Bajra Gujarati: Bajri Hindi: Bajra Kannada: Sajje Marathi: Bajri Oriya: Bajra Punjabi: Bajra Tamil: Kambu Telugu: Sajja
<i>Eleusine coracana</i>	Finger millet	Bengali: Marwa Gujarati: Nagli, Bavto Hindi: Ragi, Mandika, Marwah Kannada: Ragi Marathi: Nagli, Nachni Oriya: Mandia Punjabi: Mandhuka, Mandhal Tamil: Keppai, Ragi, Kelvaragu Telugu: Ragi Chodi
<i>Setaria italica</i>	Foxtail millet	Assamese: Konidhan Bengali: Kaon Gujarati: Kang Hindi: Kakum Kannada: Navane Marathi: Kang, Rala Oriya: Kanghu, Kangam, Kora Punjabi: Kangni Tamil: Tenai Telugu: Korra
<i>Panicum milliaceum</i>	Proso millet	Bengali: Cheena Gujarati: Cheno Hindi: Chena; Barri Kannada: Baragu

		Marathi: Vari Oriya: China Bachari bagmu Punjabi: Cheena Tamil: Pani varagu Telugu: Variga
<i>Panicum sumatrense</i>	Little millet	Bengali: Sama Gujarati: Gajro; Kuri Hindi: Kutki, Shavan Kannada: Same, Saave Marathi: Sava, Halvi, vari Oriya: Suan Punjabi: Swank Tamil: Samai Telugu: Samalu
<i>Paspalum scrobiculatum</i>	Kodo millet	Bengali: Kodo Gujarati: Kodra Hindi: Kodon Kannada: Harka Marathi: Kodra Oriya: Kodua Punjabi: Kodra Tamil: Varagu Telugu: Arikelu, Arika
<i>Echinochola crus-galli</i>	Barnyard millet	Bengali: Shyama Gujarati: Banti Hindi: Sanwa Kannada: Oodalu Oriya: Khira Punjabi: Swank Tamil: Kuthiraivolly Telugu: Udal, Kodisama

Query 2: Production Statistics: Provide information on the production statistics of these top five millets for the most recent available year

Reply: The state-wise data on production of millets, among other crops are routinely published by Directorate of Economics and Statistics, Department of Agriculture and Farmer Welfare and is available at their website: <https://eands.dacnet.nic.in/>. The latest production data available (<https://eands.dacnet.nic.in/PDF/5-Year%20Foodgrain%202016-17%20to%202020-21.xlsx>) with regard to millets production statistics during 2020-21 is furnished below.

Millet Crop	Production (000 tonnes) during 2020-21 in India
Jowar (Sorghum)	4812.07
Bajra (Pearl millet)	10863.17
Ragi (Finger millet)	1998.36
Small millets	346.95

Query 3: Geographical Distribution: Provide information on the geographical distribution of millet cultivation across different states and regions in India

Reply: The states in which the millets are grown can also be understood from the data available in the web site of Directorate of Economics and Statistics, Department of Agriculture and Farmer Welfare and is available at their website: <https://eands.dacnet.nic.in/>

The same is presented below as requested by the applicant.

Jowar growing states in 2020-21: Andhra Pradesh, Bihar, Chhattisgarh, Gujarat, Haryana, Himachal Pradesh, Jharkhand, Karnataka, Kerala, Madhya Pradesh, Maharashtra, Nagaland, Odisha, Rajasthan, Tamil Nadu, Telangana, Tripura, Uttar Pradesh, West Bengal and Delhi

Bajra growing states in 2020-21: Andhra Pradesh, Bihar, Chhattisgarh, Gujarat, Haryana, Himachal Pradesh, Jammu & Kashmir, Jharkhand, Karnataka, Madhya Pradesh, Maharashtra, Nagaland, Odisha, Punjab, Rajasthan, Tamil Nadu, Telangana, Uttar Pradesh, West Bengal, Puducherry, Delhi and Daman & Diu

Ragi growing states during 2020-21: Andhra Pradesh, Bihar, Chhattisgarh, Gujarat, Himachal Pradesh, Jharkhand, Karnataka, Kerala, Maharashtra, Nagaland, Odisha, Tamil Nadu, Telangana, Uttarakhand, West Bengal, D & N Haveli and Puducherry

Small millets growing states during 2020-21: Andhra Pradesh, Arunachal Pradesh, Assam, Bihar, Chhattisgarh, Gujarat, Himachal Pradesh, Jammu & Kashmir, Karnataka, Kerala, Madhya Pradesh, Maharashtra, Meghalaya, Nagaland, Odisha, Rajasthan, Sikkim, Tamil Nadu, Tripura, Uttar Pradesh, Uttarakhand, West Bengal and Puducherry

Query 4: Nutritional Value: I kindly request information regarding the nutritional composition of these top five millets.

Reply: Nutritional profile of millet grains (per 100g grains)

Millets	Moisture (g)	Protein (g)	Ash (g)	Total Fat (g)	Dietary Fiber (g)	Carbo hydrate (g)	Energy (K. Cal)
Pearl millet	08.97	10.96	1.37	5.43	11.49	61.78	340
Sorghum	09.01	09.97	1.39	1.73	10.22	67.68	326
Finger millet	10.89	07.16	2.04	1.92	11.18	66.82	313
Little Millet	11.36	10.13	1.34	3.89	07.72	65.55	338
Kodo Millet	14.23	08.92	1.72	2.55	06.39	66.19	329
Foxtail Millet	11.20	12.30	3.30	4.30	06.70	60.90	331
Barnyard Millet	11.90	06.20	4.40	2.20	13.60	65.50	307
Proso Millet	11.90	12.50	1.90	1.10	09.60	70.40	341

Query 5: Research and Development Initiatives: Provide information on any ongoing or completed research and development initiatives, projects, or schemes related to millets supported by the Department of Agriculture and Farmer Welfare. Additionally, any efforts undertaken to promote millet cultivation, awareness, and market development would be of great interest.

Reply: Department of Agriculture and Farmer Welfare (DAFW) does not undertake research in agriculture. Its sister department- Department of Agriculture Research and Education (DARE) has established a research institute to carry out research with regard to agriculture of millets has been established by the under the Indian Council of Agricultural Research society at Hyderabad called Indian Institute of Millets Research (ICAR-IIMR). The efforts of DAFW to promote millets are available in their specific websites <https://agricoop.nic.in/en/FarmWelfare> and <https://www.nutricereals.dac.gov.in/>. The

Research programmes, Annual reports and Publications of IIMR are available in the website <https://www.millets.res.in/>

Query 6: Best Farming Practices: It would be valuable to receive information on recommended farming practices, techniques, and technologies for millet cultivation

Reply: The information is available in the IIMR web site under "For Farmers" and "Publications". Specifically, you can refer to the following e-books, as you are desirous of availing information in digital format.

1. Latest Millet Production and Processing Technologies
https://www.millets.res.in/farmer/Latest_Millet_English_Full_Book_2020.pdf
2. Manual on good agricultural practices in millets
https://www.millets.res.in/pub/2019/GAP_manual.pdf

Query 7: Appropriate Temperature Requirements: I request information on the appropriate temperature range required for the successful cultivation of various millet crops in India

Reply: Details are available in the publications mentioned in the point no. 6 (on Best Farming Practices) above.

Query 8: Appropriate Nutrient Requirements (NPK): Please provide details regarding the appropriate nutrient requirements, specifically Nitrogen (N), Phosphorus (P), and Potassium (K), for millet crops. This information should include the recommended quantities of these nutrients per hectare (kg/ha) and per acre (lbs/acre) for optimal growth and yield.

Reply: Details are available in the publications mentioned in the point no. 6 (on Best Farming Practices) above

Query 9: Appropriate Moisture Requirements: Provide information on the appropriate moisture requirements, including the water content or irrigation guidelines, for successful millet cultivation

Reply: Details are available in the publications mentioned in the point no. 6 (on Best Farming Practices) above.

Query 10: Appropriate Soil pH Requirements: Provide information on the appropriate soil pH range (acidic to basic) for different millet crops

Reply: Details are available in the publications mentioned in the point no. 6 (on Best Farming Practices) above.
